

When pressure peaks, get protection that delivers

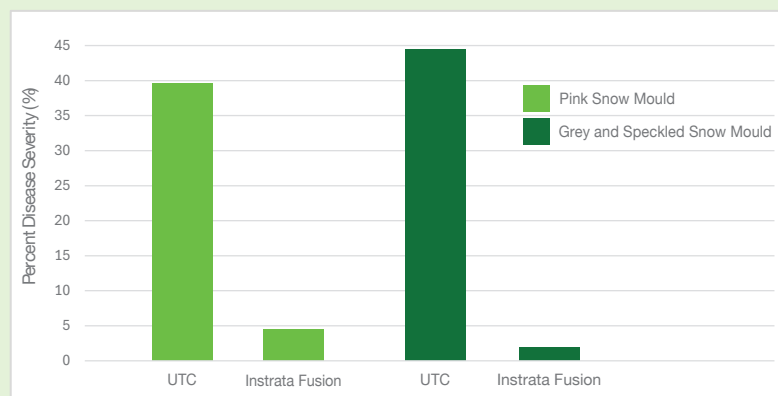

Instrata® Fusion is the next generation of powerful snow mould protection from the trusted Instrata family of fungicides, combining four active ingredients across four FRAC groups in one convenient package.

syngenta®

Performance and perseverance

Instrata Fusion brings together the power of azoxystrobin (Group 11), fludioxonil (Group 12), propiconazole (Group 3), and SOLATENOL® (Group 7). This combination of proven active ingredients helps thwart snow mould in turfgrass, especially in areas susceptible to intense disease pressure.

In winter 2025 trials conducted at golf courses in Quebec, Ontario, Alberta, and British Columbia, turfgrass treated with Instrata Fusion consistently came out of winter cleaner and healthier versus untreated checks in areas facing moderate and high disease pressure.

Helping turf weather the winter

Royal Quebec Golf Course

Application Date: October 28, 2025
Rating Date: April 27, 2026

Days of Snow Cover: 169

Carrier Volume: 800 L/ Ha

High speckled snow mould pressure

Source: Syngenta trial, QC, 2026.

TPC Toronto at Osprey Valley

Application Date: November 8, 2025
Rating Date: April 9, 2026

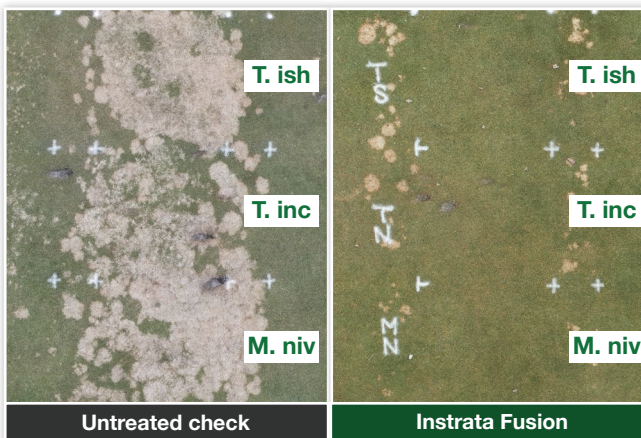

Trial plot inoculation date: November 14, 2025

Days of Snow Cover: 128

Carrier Volume: 800 L/ Ha

Each plot was broken into a 1m x 1m section and inoculated with the respective snow mould pathogen.

Source: Syngenta trial, ON, 2026.

One case has you covered

Product volumes are designed to provide convenient snow mould protection in a single case and are balanced to simplify treatment, eliminating partial jugs. Each case covers 1.2 ha (2.97 acres).

As a co-pack with Suspension Concentrates (SC) and Emulsifiable Concentrates (EC) formulations, applicators must adhere to the WALES mixing sequence. The order is as simple as A, B, C.

Application information

Active Ingredient	WALES	Case size	Case coverage	Nozzle selection	Disease controlled	Water volume (L/100 m²)	Rate (mL/100 m²)	Application	FRAC group
Azoxystrobin, fludioxonil, propiconazole, and SOLATENOL® (benzovindiflupyr)	L, E	1 dual-chambered jug of 7.2 L of Instrata Fusion A and 0.9 L of Instrata Fusion B, 3 x 3.84 L jugs of Instrata Fusion C	1.2 ha (2.97 acres)	AI, XR or Syngenta XC nozzles	Grey and Pink Snow Mould, Fusarium patch, Anthracnose	4-8	60 - Instrata Fusion A 7.5 - Instrata Fusion B 96 - Instrata Fusion C	One application, late fall before snow cover	3, 7, 11, 12

Performance evaluations are based on internal trials, field observations and/or public information. Data from multiple locations and years should be consulted whenever possible. Individual results may vary depending on local growing, soil and weather conditions.

Always read and follow label directions. Instrata® Fusion is a co-pack of Instrata Fusion A, Instrata Fusion B and Instrata Fusion C fungicides. Instrata®, SOLATENOL®, the Alliance Frame, the Purpose Icon and the Syngenta logo are trademarks of a Syngenta Group Company. © 2026 Syngenta.
