## 08 XC Nozzle

recommended for:  
Fungicides,  
insecticides,  
wetting agents and  
soluble fertilizer on  
greens, tees and  
fairways.

1. Fit Syngenta Turf XC Nozzles so that the angled spray pattern faces rearwards.
2. Insert nozzles with the Syngenta logo and moulded arrow on the nozzle to the front (facing direction of travel).

## Get even coverage

Syngenta Turf Nozzles have been specifically designed to cope with and maintain even coverage when spraying undulating ground.

The rearwards spray angle compensates for the forward movement of the sprayer, delivering better all around coverage of the turf leaf.

*The entirely new design of the Syngenta XC Turf Nozzle has been developed with a unique orifice shape that assures even coverage, even where nozzle spraying height is reduced over undulating ground.*

- More even droplet distribution
- Optimum droplet size
- Wide spray angle
- Delivers even coverage across the boom
- Aides drift reduction
- **More product hits the intended target**
